

- Pre-Dissolved Liquid Salt Concentrate
- The Fastest & Easiest Way To Make And Change Saltwater
- Perfect for Nano and Brackish Aquariums
- Use to quickly adjust salinity
- Enhanced Calcium & Magnesium Levels
- Zero Phosphates / Zero Ammonia

Fritz Quick Change is an exhibit quality, professional premium salt formula in an easy to use, unique, liquid concentrate. When mixed with fresh water, **Fritz Quick Change** produces instantly-stable saltwater with all of the major, minor and trace elements typical of natural seawater along with enhanced levels of magnesium and calcium. Unlike a dry salt mix, **Fritz Quick Change** is pre-dissolved to avoid the wait-time necessary for allowing pH and other critical parameters to normalize. **Fritz Quick Change** can be safely mixed and added instantly to an existing saltwater aquarium, used to raise salinity or for brackish aquariums.

Fritz Aquatics provides premium salt blends to professional and exhibit quality aquatic facilities around the world. The same premium materials and high quality assurance demanded by professionals is matched in every product. **Fritz Quick Change** is phosphate, ammonia and nitrate free, and is formulated to meet the needs of sensitive marine organisms.

Simply add 2 cups (16 oz) of **Fritz Quick Change** to 1 gallon of fresh water to make perfect ready-to-use saltwater.

80200 - Fritz Quick Change 64oz - Makes 4.5 Gallons
80201 - Fritz Quick Change 1 Gal - Makes 9 Gallons
