

# COMPLETE MARINE SALT MIX

Professional Salt Mix

- Complete Professional Marine Salt Mix for Reef or Fish-Only Systems
- Contains All Essential Major, Minor & Trace Elements in Correct Levels
- Enhanced Buffer Levels; Reaches a Stable Natural pH Shortly After Mixing
- Manufactured Using The Purest & Highest Quality Raw Materials
- Nitrate, Phosphate & Ammonia Free

Fritz ProAquatics Complete Marine Salt Mix is manufactured using only the highest quality raw materials. Correct pH and buffering capacity, essential minerals and trace elements have been added in precise levels to ensure a correctly blended mix for the health and longevity of your livestock.

## Dosage / Instructions:

For best results, mix with distilled or reverse osmosis water. If tap water is used, ensure it has been properly de-chlorinated. Add appropriate amount of salt to reach determined salinity, stir vigorously or aerate with an air pump to thoroughly mix the salt. Although mixed solution may be added immediately, it is recommended to wait at least 12 hours before adding to an established system to ensure clarity and complete stabilization of alkalinity and pH. Water temperature and mixing rate will influence the rate at which product completely dissolves into solution. Adjust salinity with an accurate hydrometer or refractometer.
