

# FRITZ CORAL MAX

Unique Blend for all SPS, LPS,  
Zoanthid and Goniopora Species

**MAXOUT** your coral growth and coloration with **CORALMAX!**

- Great for all SPS, LPS, Zoanthid and Goniopora species
- Can be used for target or broadcast feeding
- Unique blend of marine plankton and natural pigments

CORALMAX is a custom unique blend formulated from naturally occurring marine planktons and marine organisms. Corals require multiple types of nutrition to succeed and thrive in captivity. CORALMAX is ideal for all photo and non-photosynthetic filter feeding corals.

#### Available Sizes / Item #

Size / Treats	Item #
30 g / varies	03984
60 g / varies	03985
120 g / varies	03986

#### Directions/Dosage

Mix 1/2 teaspoon of CORALMAX with aquarium water for every 50 gallons of tank volume. For Maximum results, shut off circulation pumps and target feed the mixture directly to the corals. Broadcast feeding while pumps are on is also suitable. CORALMAX does not require refrigeration.
