Fritz Expel-P

Parasitic Disease Treatment

- Provides Fast Relief from Worms and Parasites
- Boosts Immune Competence
- Also Effective as a Dip

Fritz Expel-P (Levamisole HCl), is a fast-acting anthelmintic (anti-worm) and immunostimulant agent. Fritz Expel-P is safe to use in freshwater and saltwater aquaria and is effective against many internal parasites, especially nematodes, when used as directed. It does not harm the bio-filter, plants, other invertebrates or uninfected fish. As an added benefit, it boosts the immune competence of fish. It is effective against Nematodes, Roundworms, Nodular Worms, and Hookworms. Can be used as a coral dip to treat for flatworms and pest nudibranchs. Fritz Expel-P does not treat Cestodes (tapeworms) or Trematodes (flukes).

Dosage / Instructions:

Use 1 packet Expel-P per 10 gallons of water. Perform a 25% water change taking care to remove excreted worms/parasites after 24 hours. Repeat the cycle one additional time one week later to prevent reinfection. Repeat weekly treatments as necessary.

Use of a hospital tank is recommended. No water changes, pH or temperature adjustments necessary if readings are in ideal range. Remove all chemical filtration (carbon, ion exchange resins) during use. UV Sterilizers, if present, must be turned off during treatment. Aeration and water flow should be maintained. In marine aquariums, turn off protein skimmer during treatment. The active in Expel-P is light sensitive and works best with aquarium lights turned off during treatment. Expel-P is stable in water for up to 90 days.

Available Sizes / Item # / Treats

Size / Treats	Item #
10 pack (100 gal)	90003
20 pack (200 gal)	90001

CORAL DIP DIRECTIONS: Use three packets Expel-P per two gallons of salt water. Place affected corals into dip for up to 30 minutes with adequate water flow to assist in worm removal. Once worms stop falling off, the coral can be returned to display or quarantine tank. Treatment does not affect eggs. Treatment can be repeated once per week, up to three times.

ACTIVE INGREDIENT: Each packet contains 113 mg levamisole hydrochloride.

PRECAUTIONS: KEEP OUT OR FREACH OF CHILDREN. FOR AQUARIUM USE ONLY.
