

# A.C.C.R. Dry

Water Conditioner For Fresh and Saltwater Aquariums

- One-Step Nitrogen Cycle Management
- Does Not Affect pH
- Safe for All Plants and Aquatic Life

Fritz A.C.C.R. Dry is a unique, highly-concentrated powder that completely, instantly and safely detoxifies ammonia, chlorine and chloramine from fresh and saltwater. Fritz A.C.C.R. is non-toxic and can be used safely in all types of fish and aquatic invertebrate cultures.

Ammonia poisoning is the most common killer of aquarium fish. Ammonia is produced by decomposing plants, algae, fish waste and uneaten food. Dangerous ammonia levels often occur in new aquariums or in an established tank when adding new livestock, when a filter stops working due to power or mechanical failure or if existing beneficial bacterial colonies are lost due to the use of medications or sudden change in water conditions.

## Dosage / Instructions:

1 teaspoon will treat approx. 40 gallons (151 L) or 32 g per 1,000 L (264 gallons). Using this dosage, 1.0 mg/L ammonia will be instantly eliminated, as well as chlorine and chloramines. A.C.C.R. dosage can be safely increased to remove greater amounts of ammonia.

Water treated with Fritz A.C.C.R. Dry cannot be accurately tested with Nessler ammonia test kits nor with Winkler dissolved oxygen (DO) test kits because A.C.C.R. interferes with the reagents used in these tests. Salicylate ammonia test kits are recommended when using Fritz A.C.C.R.

NOTE: Due to the variation of granular size, conversion between volume and weight of powdered products are approximate. As a precaution, dose less than the calculated amount and measure the effect before adding the total amount.

## Available Sizes / Item # / Treats

Size / Treats	Item #
1.25 lb (4,700 gal)	62020
4 lb (15,040 gal)	62064
12 lb (45,120 gal)	62128
55 lb (206,800 gal)	62640
