

Measuring your Fritz RPM Salt

No gram scale? No problem! Use our quick conversion chart to measure with these common kitchen tools.

Simply add:

½ Cup

- or -

8 tablespoons

of

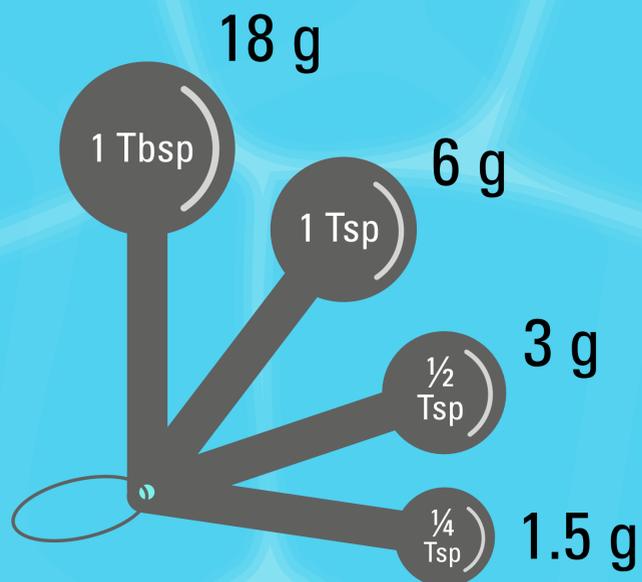

RPM Salt

1 gallon water

per gallon of water

75 g

¼ Cup

100 g

1/3 Cup

150 g

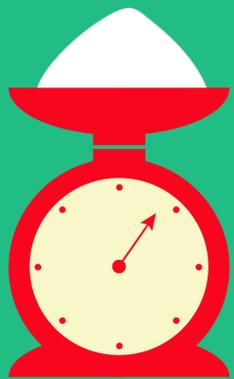

½ Cup

300 g

1 Cup

Measurements are approximate - always check with a refractometer after mixing

35 ppt

37.9 grams per liter

- or -

144 grams per gallon

- Always add salt mix to pre-measured water to reduce risk of precipitation
- Don't overmix!
- Alkalinity stabilizes after two hours and it's ready to use
